Taylor Smith

Intelligence Analyst

PROFESSIONAL EXPERIENCE

Intelligence Analyst *August 2023 – Present*

General Dynamics Information Technology/Leidos

- Conducts data analysis and data discovery to identify relevant information
- Works in a production-based environment with monthly quotas, quality requirements, and quick turnaround times (24 hours or less)
- Researches and writes a variety of intelligence reports distributed to multiple customers within the intelligence community
- Experience supporting 24/7 coverage events and shift work
- Identifies derogatory information, using a variety of analytic tools identified by the customer
- Consistently maintains at least a 97% accuracy rate for identifying and reporting information in support of customer deliverables
- Knowledgeable in global issues and in multiple disciplines
- Uses Boolean logic, ICQL, and search queries in order to make obvious and non-obvious connections while also linking data from one database to another

Quality Assurance Team *April 2025 – January 2026*

General Dynamics Information Technology

- Worked closely with multiple levels of customer management in support of the project
- Assisted with training of new analysts in a multi-week course designed to teach students how to research, document, and report relevant information
- Collaborated with a quality assurance team to evaluate the progress and accuracy of new analysts
- Answered questions and reviewed intelligence reports for accuracy

Student Workforce Trainee *June 2022 - August 2023*

Federal Bureau of Investigation

- Prepared 400 samples for a research project designed to validate the use of cold sprays in removing tape from different surfaces
- Mounted hair samples onto 150 slides to expand the reference collection
- Supported the International Training Program by revising approximately 700 PowerPoint slides covering a comprehensive array of forensic science topics
- Updated the plan for mission control to streamline evidence recovery during major crime scenes
- Created 4300 datasets and 70 graphs in Excel, summarizing field office operations in preparation for an annual performance review

Naturalist *April 2021 - May 2022*

Hidden Pond Nature Center

- Taught educational science-based programs to the public, focusing on school-aged children to supplement their learning
- Screened telephone calls to accurately answer questions and process payments
- Assisted with organization of supplies and program planning to improve efficiency
